A guide for Migration Agents

Bridge the gap between citizenship and career
success — refer your clients for an Australian
Government Security Clearance.

logitech Para Bellum GROUP

Help clients bridge from citizenship to career success

Strengthen your reputation as a full-spectrum migration advisor

Differentiate your practice

Enhance Client Value

Drive long-term satisfaction & referrals

Offer a seamless service to your clients

Good for your business!

Many skilled migrants and new Australian citizens aim for careers in government, defence, cybersecurity, and critical infrastructure — but there's a barrier few understand: Australian Government Security Clearances.

A clearance (like Negative Vetting Level 1 – NV1) is more than a formality — it's a gateway to high-impact, secure, and well-paid roles.

Without it, your clients may miss out on their dream positions.

Add This Service to Your Migration Portfolio

By offering Security Clearance Guidance & Sponsorship Support, you can:
✅ Enhance client value: Help your clients access careers they otherwise couldn't.
✅ Differentiate your practice: Few migration agents provide post-visa career support.
✅ Drive long-term satisfaction & referrals: Clients with clearance success are loyal and refer others.

How the Service Works

Our Security Clearances New Citizen Service includes:
- Step-by-step guidance through the Australian Government Security Vetting Agency (AGSVA) process.
- Sponsorship for Australian citizens, starting with NV1 clearance.
- Optional transfer of sponsorship to employers when applicable.
- Future-proofing careers in sectors requiring clearance.

Why Partner With Us?

We provide a referral or integration model for migration agents, allowing you to:
- Offer a seamless service to your clients without administrative burden.
- Help clients bridge from citizenship to career success.
- Strengthen your reputation as a full-spectrum migration advisor.

Next Steps for Your Clients

1. Refer your client to our Security Clearance Service.
2. We guide them through every step of the clearance process.
3. Your client unlocks career opportunities in government, defence, and national security sectors.

SECURITY CLEARANCES

Unlike generic Security Clearance services, we can provide a career pathway.

Security Clearance reimbursement model - Candidate $ cash back!

Defence Industry Security Program (DISP Level 3) certified.

Managing Australian Government Security Clearances since 2007.

Candidates do not have to be an employee or sub-contracted to us. We support any Australian citizen seeking Security Clearance.

We can sponsor Baseline, NV1, and NV2 Security Clearances, including clearance upgrades and reactivations.

What is the Defence Industry Security Program (DISP)?

DISP membership is open to any Australian entity looking to become part of the Defence industry supply chain.

To become a DISP member, an industry entity needs to comply with the eligibility criteria through the Department of Defence and the Australian Government Security Vetting Agency.

Only DISP Members can sponsor security clearances. There are also additional criteria based on the level of membership required. There is now a growing requirement for Security Clearances in industries other than Defence.

The Government operating environment is changing

Increasingly, contracts now mandate a clearance for any hardware or software-related work.

This shift is no longer limited to Defence alone. Where work involves sensitive systems, protected information, or personal and medical-in-confidence data, an NV1 clearance is rapidly becoming the standard requirement.

This includes work associated with: Department of Defence, Australian Taxation Office (ATO), Services Australia, NDIS and other agencies managing personal or health-related data.

In practical terms, even roles that were historically considered "non-sensitive" are now falling within clearance-required environments.

About Security Clearances

Logi-Tech is Defence Industry Security Program (DISP Level 3) certified. We have been managing Australian Government Security Clearances since 2007, sponsoring Baseline, NV1 and NV2 Security Clearances.

We have in-house Security Officers guiding Australian citizens through every step of the Australian Government Security Clearance process.

The Logi-Tech difference!

Career pathways for your clients

Unlike other Security Clearance providers, we can provide a career pathway. Logi-Tech and its group partners are also consulting and labour-hire firms. We provide experienced and qualified staff to key departments in defence, government, and industry.

We have access to a broad range of meaningful, high-impact positions and opportunities. Opportunities include engineering, cybersecurity, and ICT, project management, and corporate positions.

Your candidates can elect to pursue an opportunity with us or not. It is their choice and will not impact the Security Clearance process.

Candidate clearance reimbursement model

We will reimburse the full clearance cost once a candidate has completed at least 30 days on contract with any Para Bellum Solutions Group (Logi-Tech, Enginium, or Para Bellum Solutions) client within two years.

This means they can move forward with confidence, knowing we are invested in their success.

Defence and Government Careers with us may include:
