Overview.

For Individuals.

For Business.

For Agencies.

Solutions for Individuals

- Logi-Tech provides the accredited AGSVA sponsorship required to initiate Baseline, NV1, and NV2 clearances, allowing talented professionals to bypass recruiter filters and command premium salaries.
- Through our Security Cleared Careers channel, candidates can utilise a reimbursement model where clearance expenses are returned if placed in a role through our defence partners.
- Applicants can effortlessly initiate the process with a \$0 pre-application form and access flexible payment options available through Zip.

The Logi-Tech Advantage

- We are a 100% Australian, Veteran-Owned firm leveraging 40 years of heritage delivering integrated technology services to Government and Defence.
- Our operations are backed by the highest industry security accreditation—Defence Industry Security Program (DISP Level 3)—and safeguarded by Cyber-Hardened Essential Eight Maturity Level 2 infrastructure.
- Led by staff with senior military experience, we apply a "Mission First" mindset to every vetting lifecycle to rigorously protect Australia's sovereign interests.

Business Offerings

- Outsourcing clearance administration to Logi-Tech allows your workforce to operate in secure environments, qualifying your organisation to confidently bid for Defence and government work.
- For companies applying for their own DISP accreditation, our E8 Defender service delivers actionable support to help you navigate and achieve Essential Eight cybersecurity compliance.
- Beyond managing clearances, we actively place premium, ready-to-deploy security-cleared candidates and complete project teams directly into your business.

Transparent Investment

- Initial application fees encompass standard AGSVA fees, GST, and your first 12 months of sponsorship: Baseline is \$2,750, NV1 is \$4,730, and NV2 is \$7,370.
- To monitor clearance status and maintain sponsorship, an ongoing annual fee of \$550 applies starting in the second year for all clearance types.
- We pride ourselves on offering Australia's most competitive fee structure, complete with negotiable group discounts and tailored fee models for business partners.

Why choose Logi-Tech?

At Logi-Tech, we're built on decades of distinguished Australian Defence Force (ADF) service and strategic advisory roles with NATO and allied governments.

We bring integrity and insider knowledge to the table, and combine military precision with global consulting experience to deliver a strategic approach to navigating personnel and facility security.

Logi-Tech has been delivering integrated technology and cybersecurity services for 40 years.

Our company is 100% Australian and Veteran-Owned, led by Senior Personnel who hold active leadership roles in Defence.

As a Tier-1 cyber firm with the integrity and discipline of a Defence-led organisation, Logi-Tech doesn't just check boxes; we safeguard Australia's sovereign interests.

We are a Defence Industry Security Program (DISP Level 3) accredited provider of Security Clearance sponsorship.

Since 2007, we've guided Australian citizens through every step of the Australian Government Security Clearance process for Baseline, NV1, and NV2.

We place the right people into premium defence, government, and industry roles with our clients.

We do more than clearances.

We, and our Para Bellum Group partners, provide experienced, security-cleared, and qualified staff to key departments in defence, government, and industry.

Individuals applying for a security clearance can opt to pursue an opportunity with us or not, once their clearance is granted. It is their choice and will not impact their Security Clearance process.

Beyond managing clearances, we actively place premium, ready-to-deploy, security-cleared candidates and complete project teams directly into your business.

Defence-Led Integrity

Led by staff with hands-on military experience at a senior level, we bring defence discipline and a "Mission First" mindset to every vetting lifecycle.

Cyber-Hardened Infrastructure (E8ML2)

Operations are underpinned by Essential Eight Maturity Level 2 compliance. We don't just manage clearances; we safeguard the data behind them.

40 Years of Heritage

100% Australian, Veteran-owned firm with four decades of experience delivering integrated technology services to Government and Defence.

GO Day 1 Readiness

Our model leverages automated pre-validation to turn "invisible" talent into "cleared" assets, accelerating the AUKUS and sovereign infrastructure pipelines.

DISP Level 3 Certified

We hold the highest level of industry security accreditation, enabling them to manage the most sensitive clearance requirements.

Flexible payment options available through Zip. Terms and Conditions Apply.

clearances.logitech.com.au

Working with classified information and on classified projects, requires clearance.

What is a Security Clearance for?

In Australia, safeguarding classified information under the *Protective Security Policy Framework* (PSPF) is managed using a strict, multi-agency governance structure. This ensures that only trustworthy individuals can access sensitive government and military assets, including information classified as Protected, Secret and/or Top Secret.

Before you or your business can work with classified information, you and relevant staff must be granted one of the four relevant security clearance levels:

1. Baseline to access Protected information (Logi-Tech sponsored)
2. Negative Vetting Level 1 (NV1) to access Secret information (Logi-Tech sponsored)
3. Negative Vetting Level 2 (NV2) to access Top Secret information (Logi-Tech sponsored)
4. TS-PA for Top Secret-Privileged access (via other sponsoring authority)

The *Australian Government Security Vetting Agency* (AGSVA) is the primary authorising body that meticulously assesses and grants Baseline, NV1 and NV2 clearances. The *Australian Security Intelligence Organisation* (ASIO) manages the highest tier clearance, Top Secret-Privileged Access (TS-PA).

Individuals cannot legally apply for or purchase a clearance independently. The *Department of Defence* mandates applicants be sponsored through its *Defence Industry Security Program* (DISP).

Within the governance structure, Logi-Tech is a *DISP-accredited sponsor* for Baseline, NV1 and NV2. This means that we can provide the mandatory compliance and administrative framework needed to initiate a security clearance request on your or your staff's behalf.

With us, you get our accredited AGSVA clearance sponsorship and step-by-step guidance.

Are you currently applying for DISP accreditation?

For organisations applying for DISP accreditation, we know the landscape of DISP compliance and Essential Eight maturity can be complex and daunting. Logi-Tech also delivers Essential Eight – Maturity Level 2 with our E8 Defender program. E8 Defender delivers a complete, evidence-backed uplift solution customised to your current posture, goals, and compliance requirements. Whether you're at Maturity Level 0 or just shy of Level 2, we can get you there.
